

WORKSafe® FACE SHIELD

HEAD PROTECTION

WORKSafe Face shield is made of Polyethylene Terephthalate (PET) plastic. As compared to Amorphous-polyethylene Terephthalate (APET), PET plastic is a lot harder so it does not scratch easily. Furthermore, it provides a clearer vision, which is better for the eyes.

Usage information:

Stretch the elastic band and rest the foam on your forehead. The band should be well secured around the head.

Please take note of the following:

This face shield will only protect you from non-corrosive liquids and dust. It is not strong enough to guard you against any form of impact risk. Do not use the product under a high heat environment e.g. open flames and sparks etc. Always use as directed.

Face Shield (dimension): 32 x 24cm

Foam (volume): 3 x 3 x 29cm

Polyester elastic strap (dimension): 1.9cm x 30cm
