

WORKSafe® FR FACE MASK RESPIRATORY PROTECTION

Reliable, reusable masks that will shield you from workplace heat hazards. This fire-resistant mask defends well against heat hazards such as flash fires and sudden flames. An anti-bacterial inner layer makes it suitable for blocking microbial hazards.

Product Info:

- Made of Nomex® IIIA fabric, renowned for its comfort, fire resistant and moisture-wicking properties.
- Available in five colours.
- Suitable for utilities, manufacturing, oil & gas and chemical industrial work.

Notes for use:

- Wash your mask frequently to ensure that no greases, oily soils or other flammable contaminants are present during use.
- Ensure that the FR masks are clean and in proper condition before each wearing.
- Retire any mask with visible holes, rips, and/or tears or contamination from flammable materials.
- Destroy retired masks so that they cannot be re-used.
